

Module structure

This module aims to support community groups looking to invest in a renewable project that is being developed by a commercial developer. The module outlines a number of different sources of finance to consider when making an investment decision and where to obtain further information when considering the investment.

It is part of the CARES Toolkit and in addition to this module, there are other relevant guidance documents and tools available.

- [Project finance module](#) – this module provides an overview of renewable project finance, the terms that are used and how to determine the financial viability of a project.
- [Shared ownership module](#) – this module provides support to community groups looking to invest in a renewable project that is being developed by a commercial developer. The module outlines the different factors that need to be considered when making an investment decision and how to obtain the relevant support when making these investment decisions.
- [Finance glossary](#) – a summary of the finance terms used in renewable projects.

This paper includes information on a number of different sources of finance that can be used to fund various stages of a community group's involvement in a renewable energy project. The stages discussed are as follows.

Development of a renewable project

The development of a community owned renewable project can incur substantial costs. Grants and loans are available to fund this development.

Construction of a renewable project

Under state aid rules, there are limits to the amount of grant funding that is available for construction of a public renewable project that will allow the project to also benefit from additional support mechanisms. As such, construction of a public renewable energy project is generally funded through loan finance.

Investment by a community in a commercially developed renewable project

Finance options available to a community group looking to invest in a commercially developed renewable project will be dependent on the sources of finance used by the

developer. The table below provides an indication of a number of sources available to community groups in general, but those that will apply will be specific to each project.

The following table presents a range of different sources of finance and highlights which stage of your project they would be appropriate to finance. This list is not exhaustive, and there will be other sources of finance available beyond those mentioned here.

Name	Description	Link	Develop ment	Constru ction	Invest ment
CARES Enablement Grant	CARES provides grant funding to community groups, third sector organisations and cooperatives to help towards the costs of feasibility studies, community consultation and other preparatory costs. Up to £25,000 is available for community groups to fund non-capital aspects of a project, to investigate shared ownership or to plan for community benefits.	CARES enablement grant	X		
Scottish Forestry Community Fund	The Scottish Forestry Community Fund aims to support community groups and organisations that are encouraging and facilitating greater use of woods by people to derive health, well-being, and community benefits.	Scottish Forestry Community Fund	X		
Private Grant Funding (eg Community Benefit Funding)	<p>According to the Scottish Government's Register of Community Benefits paid by Scottish wind farm operators have topped £21m each year. It may be worth investigating your local wind farm to see if your project is eligible for funding.</p> <p>Community group projects may be eligible for funding through Community Benefit Funding from a local wind farm.</p>	Community Benefit Register	X	X	X
Pioneer Share Offers	Early-stage share offers with a higher return may be offered to finance early stages of a project where risks are higher. Pioneer Share Offers are early-stage share offers where a higher return may be offered to finance the high risk early stages of a project.	Pioneer Share Offers	X		
CARES funding	<p>The CARES can provide support to community applicants developing renewable energy generation schemes on land they own or could lease from a landowner.</p> <p>Case study: Callander Community Hydro</p>	CARES funding	X	X	

Name	Description	Link	Develop ment	Construc tion	Invest ment
Resilient Scotland	<p>Start & Grow and Making Enterprise Happen offer mixed grant and loan packages up to £500,000. Start & Grow can provide unsecured investment up to £60,000, 1/3 grant and 2/3 loan. Making Enterprise Happen can make investments up to £500,000, with at least 50% of all investments being repayable. All investments for the purchase or redevelopment of an asset will require to be secured. Scheme operates in 13 local authorities (Clackmannanshire, Dundee City, East Ayrshire, City of Edinburgh, Fife, Glasgow City, Inverclyde, North Lanarkshire, North Ayrshire, Renfrewshire, South Lanarkshire, West Dunbartonshire, and West Lothian). Due to COVID-19 Resilient Scotland have closed new application for the foreseeable future.</p>	Start & Grow and Making Enterprise Happen	X		
Pure Leapfrog	<p>Pure Leapfrog provides finance for community-led projects across the UK to help fund the capital costs of installing renewable energy technologies and energy efficiency measures.</p> <p>Case studies available on the website.</p>	Pure Leapfrog		X	X
Communities for renewables (CfR)	<p>CfR is a social enterprise that helps proactive communities harness the value of their renewable energy resources and retain that value within the local economy. CfR has funds to provide pre-planning risk investment for suitable community energy generation projects. CfR recovers this investment through contingent fees that are only charged where projects are successful.</p>	Communities for renewables	X	X	
Thrive Renewables	<p>Thrive Renewables focuses on low financial risk projects that use proven technologies and operate on long-term contracts. Projects must have minimal impact on communities and the environment through careful planning. Thrive Renewables also supports community involvement.</p> <p>Case Study: Udny Community Wind Turbine Case study: Barra & Vatersay</p>	Thrive Renewables		X

The Co-operative Bank	<p>Although not currently active in the market, it is worth mentioning the Co-operative group as it has supported a large number of community energy developments.</p> <p>Case study: Tiree Renewable Energy Limited Case Study: Rousay, Egilsay and Wyre Development Trust</p>	The Co-operative Bank		X	
Santander	Santander have supported a number of renewable energy projects in the UK and are looking at the implications of investing in community scale projects.	Santander Renewables		X	
Scottish Investment Bank	<p>The Energy Investment Fund (EIF) can be applied for by community renewable energy projects that have successfully gained planning permission. EIF is delivered by the Scottish Investment Bank, on behalf of the Scottish Government, and is designed to build on the early-stage support provided through the CARES programme.</p> <p>EIF offers a flexible lending service that can be tailored to individual community projects that have advanced to the delivery stage, but still have challenging funding gaps. The majority of the investment opportunities are expected to arise from community-led renewables projects, but EIF can also consider larger and more bespoke deals involving the funding of community investments into projects led by private developers or utilities. Further details on the eligibility criteria for EIF funding can be accessed from the Scottish Enterprise website.</p> <p>Local Energy Scotland can guide communities through the EIF application procedures, providing advice and support for you to develop your project to a stage that is application ready.</p>	EIF Fund		X	
Social Investment Scotland	Social Investment Scotland (SIS) is a registered charity and social enterprise that provides business loans to third-sector organisations. SIS aims to support the creation and growth of charities, community organisations and social enterprises that have the capability to make sustainable social impacts.	Social Investment Scotland		X
